

Rainwater Harvesting Services by NCPC

Sustainable & Cost-Effective Solutions for a Water-Secure Future

About Us

National Cleaner Production Center (NCPC) is a professional Environmental Services Company dedicated to providing sustainable water management solutions. Our expertise lies in designing and implementing efficient rainwater harvesting systems that help conserve water, reduce dependency on external sources, and recharge groundwater reserves.

Rooftop Rainwater Harvesting Services by NCPC

We offer complete end-to-end solutions for rooftop rainwater harvesting systems:

1. Site Assessment

- Evaluation of rooftop area and structure
- Estimation of water harvesting potential

2. System Design

- Customized system layout based on building
- Design of pipelines, filters, and recharge structures
- Estimated cost evaluation

3. Installation

- Installation of rooftop collection systems
- Installation of piping and filtration units
- Construction of recharge wells, pits, or trenches

4. Groundwater Recharge

We specialize in channeling collected rainwater directly into the ground through: - Recharge wells - Soak pits - Percolation tanks. This process helps: - Restore declining groundwater levels - Improve water table sustainability - Reduce urban flooding

5. Maintenance & Support

- Regular inspection of systems
- Cleaning of filters and pipelines
- Performance monitoring and reporting

Benefits of Services by NCPC

- Significant reduction in water bills
- Sustainable water management
- Environmentally friendly solution
- Increased water table and groundwater availability
- Compliance with environmental regulations
- Low-cost solution

Why Choose NCPC?

- *Experienced technical team*
- *Customized solutions for each client*
- *Use of durable and efficient materials*
- *Timely project execution*
- *Proven track record in environmental services*
- *Cost effective designs*
